DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Obata et al in view of Mizikovsky. Obata et al discloses the claimed invention except for the specific use of a digital telephone and the telephone number detecting means. The claimed memory storage features are taught, for example, at column 9, lines 18-44. Deletion of previously stored matching numbers per claim 15 is implied. Telephone number storage unit 11a-2 corresponds to the registering memory of claim 1 and the second memory of claim 2. Mizikovsky teaches that it is known to obtain caller identification information from transmissions in a digital cellular telephone system. See column 10, lines 35-54. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the call storing system of Obata et al so as to obtain caller identification information from transmissions in a digital cellular telephone system, as taught by Mizikovsky, in order to provide a call storing apparatus which can operate in a digital telephone system and to eliminate the need for the caller to enter the telephone number.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references were cited in parent application Serial No. 08/728,359.
